EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year of Passing
B.tech (CSE)	AKTU (Dr. A.P.J. Abdul Kalam Technical University)	7.18 (Current)	2028
12th Standard	Modern Academy Sr. Sec. School	78%	2023
10th Standard	Modern Academy Sr. Sec. School	84%	2021

EXPERIENCE (Fresher)

Full Stack Developer & Project Lead

Feb 2026 - Present

Pragyaan 2026 (IIT Jammu)

Remote / Hybrid

– ArchitectedPragyaan 2026usingNext.js & Django; scaled to85+ schoolswithOAuth2& real-time dashboards.

Web Developer

Jan 2025 - Present

Personal Projects & Open Source

Remote

– DevelopedReal-time Chat App(WebSockets) andWeather App(Open-Meteo) usingReact & Tailwind.

PROJECTS

Pragyaan 2026 (IIT JAMMU)

Full Stack Developer / Event Platform Architect

Live Site

– Tools & technologies used:Next.js, React, Tailwind CSS, Python, Django, SQLite, Google OAuth2.

– Architected a comprehensive event management platform featuring integrated zones for STEM, Science, Arts, and Innovation.

– Developed "Manthan," a specialized portal for educational leaders with abstract submission and agenda management systems.

– Implemented dynamic user dashboards for real-time schedule tracking and live competition scores, scaling to support 85+ schools.

Chat With Friend

Real-time Messaging App with Emoji & Reactions

Github

– Tools & technologies used:Django (Channels, Daphne), React 18, TypeScript, Vite, Tailwind CSS, SQLite.

– Developed a real-time messaging application featuring instant message broadcasting via WebSockets.

– Implemented a modern capsule-style UI with emoji picker support, message reactions, and typing indicators.

– Ensure seamless responsive design for both mobile and desktop users.

Modern Weather App

Responsive Weather Application with Forecasts & AQI

Github

– Tools & technologies used:React 19, Vite, Tailwind CSS 4, Lucide React, Leaflet, Axios, Open-Meteo API.

– Developed a responsive weather application providing real-time data, 10-day forecasts, and AQI monitoring.

– Implemented dynamic backgrounds that change based on current weather conditions and an interactive map for exploring global weather.

– Features include real-time search for any city and comprehensive health recommendations based on AQI.

TECHNICAL SKILLS

- **Programming:**C/C++*, Python, Java, Javascript, Typescript, SQLite
- **Tools:**Github*, AI*, Docker, VS Code, Neovim
- **Libraries/Frameworks:**Django, ReactJS*
- **Operating Systems:**Windows, Linux,Mac
