

RISHABH DWIVEDI

Software Developer

+91-9118358910 — rd1538350@gmail.com — [LinkedIn](#) — [GitHub](#)

Professional Summary

Computer Science undergraduate (B.Tech, expected June 2028) with hands-on experience building full-stack web applications using React.js, Node.js, Express.js, FastAPI, and MongoDB. Completed two Python-based software engineering internships, working with REST APIs and Git-based Agile workflows. Strong foundation in Data Structures, Algorithms, and System Design. Seeking a Software Developer role to build scalable, real-world solutions.

Technical Skills

Languages: Python, JavaScript, C, C++, HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Express.js, FastAPI, Django, Tailwind CSS

Databases & APIs: MongoDB, PostgreSQL, MySQL, REST API, JWT, OAuth, WebSockets

AI/ML: RAG, Agentic AI Workflows, Prompt Engineering, LangChain, LLM API Integration

Tools & Cloud: Git, GitHub, Docker, Postman, AWS (S3, EC2), Vercel, Render

Fundamentals: Data Structures & Algorithms, OOP, System Design

Professional Experience

Python Development Intern

January 2026 – April 2026

Codveda Technologies, Remote

- Built and integrated REST APIs implementing CRUD operations for seamless data exchange between backend services and databases.
- Implemented rate limiting on API endpoints to prevent abuse and ensure stable performance under high request loads.
- Automated repetitive data-handling tasks using Python, reducing manual processing effort by an estimated 30–40%.
- Collaborated with the development team using Git for version control, contributing to iterative script improvements.

Python Developer Intern

May 2026 – July 2026

Infotact Solutions, Remote

- Developed Python automation scripts that streamlined repetitive manual tasks across daily data workflows.
- Partnered with a 4-member engineering team to identify automation opportunities and translated requirements into production-ready scripts following SDLC best practices.
- Tested automation scripts across multiple input formats and edge cases, ensuring reliable execution in production environments.

Projects

NEXUS AI — Intelligent Chatbot Platform

June 2026

React.js, Node.js, Express.js, MongoDB, Socket.io, Gemini AI, LangChain

[Live Demo](#) — [GitHub](#)

- Built a real-time AI chatbot platform integrating Google Gemini 1.5 Flash API with live messaging via Socket.io and JWT-based authentication.
- Persisted chat history using MongoDB Atlas and designed a basic payment integration flow for premium subscription plans.
- Hardened the application with rate limiting (100 requests/minute using token bucket algorithm), input sanitization, and Helmet.js security headers.
- Built a fully responsive UI and deployed backend on Render, frontend on Vercel, with environment-based configuration to protect API keys.

InkVerse — Blog Platform

May 2026 – Present

React.js, FastAPI, Python, MongoDB, JWT, Axios

[GitHub](#)

- Developed a full-stack blog platform with JWT authentication and bcrypt-based password hashing via Passlib.
- Built a RESTful backend with FastAPI and the asynchronous MongoDB driver Motor, supporting publish/draft states, search, and tag-based filtering.
- Implemented comment creation/deletion and like/unlike functionality, connected to a React single-page application through Axios.

SkyIndia — Interactive Airport Booking Experience

April 2026

React 19, TypeScript, Vite, Tailwind CSS v4, GSAP, Framer Motion, React Three Fiber, Recharts

[Live Demo](#) — [GitHub](#)

- Built a 10-page airport platform supporting one-way, round-trip, and multi-city flight search, with an interactive SVG world map showing animated flight routes.
- Implemented shortest-path terminal navigation using graph traversal logic for efficient route calculation.
- Designed an immersive interface with glassmorphism styling, dark/light themes, GSAP and Framer Motion animations, React Three Fiber 3D visuals, and a Recharts analytics dashboard.

Certifications and Training

Data Analytics Job Simulation, Deloitte (via Forage)

November 2025

- Completed a virtual job simulation covering data analysis and forensic technology tasks on datasets exceeding 100,000 records, applying structured problem-solving to identify data inconsistencies.

Education

Dr. APJ Abdul Kalam Technical University

Lucknow, India

Bachelor of Technology in Computer Science and Engineering

Expected: June 2028
